Practitioner Survey Results

In an Australian and New Zealand clinical survey, 82 busy healthcare professionals agreed to take part in a 10 day challenge to see if **Adrenergy FORTE®** could improve their ability to cope with stress and increase their energy levels. Participants were asked to rate their ability to cope with stress and rate their energy levels (both mental and physical) on a scale of 0-10 (0 being very poor and 10 being excellent), before and after taking 2 tablets of **Adrenergy FORTE®** daily for 10 days.

The results showed significant improvements within 10 days of supplementation.

Improved energy levels & ability to cope with stress in only 10 days

Significantly improved ability to cope with stress

Significantly improved energy levels
