

Lymphodran Immune

Highly Bioavailable Phytosome™ Quercetin Formulation

Orthoplex Lymphodran Immune uses Phytosome™ technology to overcome quercetin's inherently low solubility and bioavailability. Quercetin is lipophilic, so incorporating it into the phospholipids of a phytosome releases it into the lipid environment of enterocytes, allowing efficient delivery into the bloodstream¹.

Pharmacokinetic research has shown that this type of delivery system can facilitate up to a 20-fold increase in plasma levels compared to the same amount of standard quercetin.¹

Lymphodran Immune combines this quercetin Phytosome™ with other key nutrients including vitamin C and rutin.

- ✓ **Gluten Free**
- ✓ **Dairy Free**
- ✓ **Soy Protein Free**
- ✓ **Vegan**

- ✓ Highly bioavailable, non-GMO Phytosome™ quercetin
- ✓ Up to 20 times more bioavailable
- ✓ Combined with the benefits of rutin and vitamin C

Indications

- Supports the immune system to fight illness
- Anti-inflammatory
- Supports cardiovascular system health
- Supports blood capillary and vessel health
